

EMA ADVISORY

Space Capabilities

EMA Advisory specialises in supporting commercial arrangements to enable **Australia's emerging space industry**.

Our Space Capabilities Team are AGSVA **security cleared**, hold qualifications in law and commercial management, and undertake ongoing **dedicated space industry training** to ensure they are best placed to support the acquisition and sustainment of military & space industry capabilities.

Our team uses their unique mix of Commercial, Project Management and Space capability knowledge to:

- Enter and manage complex commercial arrangements;
- Navigate ACMA and ITU requirements;
- Navigate launch licence requirements and partner launch cross waiver requirements;
- Manage all elements of Space Capability projects to deliver complex and emerging capabilities.

Our Space Capabilities Team works closely with Department of Defence, the Australian Space Agency and Geoscience Australia to deliver satellite services projects to the Australian Government.

We also partner with Industry bodies, such as the Space Industry Association of Australia (SIAA) to stay connected with Industry and emerging Space issues.
